

CERTINIA FIXED ASSET MANAGEMENT (FAM) AUTOMATION

OVERVIEW: Automate the complete lifecycle of your fixed assets to ensure financial accuracy and bulletproof audit readiness.

1. BUSINESS FRICTION

Current operational roadblocks and pain points.

■ Manual Tracking

Fixed assets are tracked in disconnected spreadsheets, leading to lost assets and wasted administrative effort.

■ Inaccurate Valuation

Manual depreciation calculations frequently result in inaccurate asset valuations on the balance sheet.

■ Audit Challenges

Lack of a centralized, system-driven audit trail makes financial audits painful, slow, and highly risky.

2. OPPORTUNITY

The AblyPro mechanism deployed to modernize operations.

■ Automate Capitalization

Systematically capture and capitalize assets the moment they are procured, eliminating manual data entry.

■ Automate Depreciation

Configure automated depreciation schedules (straight- line, declining balance) that run seamlessly every month.

■ Track Transfers

Establish a rigorous, system-tracked process for asset transfers, retirements, and write-offs.

3. OUTCOME

Measurable business value and financial returns.

► Reduced Manual Effort

Free your accounting team from the tedious, error-prone task of managing massive asset spreadsheets.

► Financial Accuracy

Ensure your balance sheet always reflects the perfectly accurate, real-time value of your corporate assets.

► Audit Readiness

Breeze through financial audits with a fully transparent, system-enforced trail for every single asset event.
